ANIMAL BITES

If possible to do so without endangering other people, the animal should be caught and kept until it is tested for rabies or other diseases. Call Humane Society.

1. Do not try to stop bleeding from non-major animal bites. Bleeding will clean out the wound.
2. Wash wound thoroughly with mild soapy solution.
3. Cover wound with sterile dressing.
4. Keep person calm and warm.
5. Call a doctor. Animal bites are dangerous and should be checked by a physician.

BLEEDING

In severe cases it is essential to stop the bleeding first, then get medical assistance.

The 3 First Aid methods for stopping bleeding are:

DIRECT PRESSURE
PRESSURE POINTS
TOURNIQUET

1. In the direct pressure method, pressure is applied directly on the wound itself; use a sterile cloth if possible. This method will usually control the flow of blood; always consider this method first. If severe bleeding continues, it will be necessary to use the pressure point or tourniquet method.
2. The pressure point method is used to stop arterial bleeding (blood bright red spurting) from arms or legs. In this method, pressure is applied to the artery supplying the blood. For bleeding from the arm the pressure point is mid-way between the armpit and elbow on the inner arm. For the leg the pressure point is just below the groin on the front inner half of the thigh.

With severe arterial bleeding, it is important that you locate the pressure point within seconds. Therefore, practice locating the pressure points so that you will find them instantly in an emergency.

If severe bleeding cannot be stopped quickly by direct pressure or the pressure point method, a tourniquet must be used.

3. The tourniquet method is used to stop the flow of blood to and from the limb by tying a band as close to the wound as possible between the wound and the heart. Improperly used, a tourniquet can cause loss of limb or aggravate shock. However, when severe bleeding from an arm or leg cannot be stopped within seconds by the preferred methods, a tourniquet must be used to save a life.

BURNS

1st Degree Burn (Skin Red and Tender)

1. Flush with cold water.
2. Cover burn with gauze or dry sterile dressing.

2nd Degree Burn (Skin Red, Tender, and Blistering.

BURNS CONT

1. Immerse in cool water (not ice water).
2. Gently blot dry. Do not break blisters.
3. Do not use grease or anteseptics.
4. Cover with dry clean/sterile dressing.
5. Call physician.

3rd Degree Burn (Skin Burned or Charred)

1. Call a doctor.
2. Do not remove adhered particle(s) of charred clothing.
3. Cover with thick sterile dressing, freshly ironed or laundered sheets or linen.
4. Elevate burned area.
5. Seek medical assistance immediately.

CHOKING

People who choke on food usually cannot speak or breathe. If person is coughing, let him cough out object.

Do not slap someone on the back at first signs of choking. Only if a person cannot clear the airway must you help.

BACK BLOWS

A rapid series of sharp blows delivered with the hand over the spine and between the shoulder blades. (Small child can be held upside down).

MANUAL THRUSTS

A series of thrusts to the upper abdomen or chest to force air from the lungs.

1. Stand behind the victim.
2. Reach around bear-hug style with your hand across the abdomen, between the navel and the rib cage.
3. Pull toward you in a quick upward thrust (repeat if necessary).

It might be necessary to remove the foreign object with your fingers. Be cautious not to push the object farther down the throat. Do not use fingers to remove foreign body from child's throat unless you can see object.

DROWNING

If the person is unconscious, you must administer artificial respiration and call for immediate medical assistance.

1. Determine that person is unconscious, not breathing and/or has no pulse. Administer CRP using mouth-to-mouth resuscitation and chest compressions.
2. Turn victim's head to one side to prevent vomit from entering lungs.
3. Keep victim warm and comfortable.
4. Seek medical assistance immediately.

FAINTING

Fainting is a partial or complete loss of consciousness due to temporary in sufficiency of blood supply to the brain. Fainting might constitute a brief episode in the development of a serious medical problem; call your physician.

SYMPTOMS

Complaints of weakness, dizziness, or spots before the eyes, pale or sweaty appearance.

1. Place victim on his back with head lower than his feet.
2. Lossen clothing and cover with blanket if necessary.

FAINTING CONT

3. Use a cold compress on victim's face or ammonia inhalent to revive.
4. Have victim rest at least 15 minutes.

Do not give liquids or food.

FRACTURES & BROKEN BONES

Warning* Persons with neck and back injuries should not be moved by anyone except trained medical personnel, except in life threatening situations. Request medical assistance immediately.

In the case of an open fracture, stop the bleeding first and cover the wound with a sterile dressing.

1. Allow victim to place break in comfortable position.
2. Apply splint to immobilize the limb.
3. Place victim on his back and cover with blanket if necessary.

HEART ATTACKS

When the first signs of an attack appear, immediately call ambulance or get the victim to an emergency hospital. If this is not possible, call for medical assistance.

Warning* Call a physician even if the victim thinks he will feel better in a few minutes.

SYMPTOMS

Pain and/or pressure feeling in the upper abdomen, chest, possibly extending into the arms or neck. Shortness of breath, nausea, vomiting, and sweating.

1. Place victim in comfortable reclining position.
2. Loosen clothing.
3. Keep victim calm and cover with blanket if necessary.
4. If victim stops breathing, apply artificial respiration.
5. If victim looses consciousness, his heart may have stopped... Apply CPR. To learn CPR (Cardiopulmonary resuscitation) call your local Heart Association or Red Cross.

HEAT STROKE

Heat stroke is characterized by high body temperature, hot, flushed skin, rapid but weak pulse and possible unconsciousness.

Remove the victim from the source of heat immediately, into a cool area. Seek help at the nearest emergency room. While enroute to the emergency room, victim will benefit from being sponged on side of neck, armpits, sides of chest and on inner thighs with cool water.

Heat exhaustion, characterized by pale and clammy skin, nausea, headache and weakness, may be treated with sips of water. Bring the patient to an emergency room.

Heat cramps are characterized by spasms in the legs and abdomen. Place patient in cool area and gently massage the affected areas. Take two salt tablets every

HEAT STROKE CONT

15 minutes, if available. If salt tablets are not available, mix ¼ tsp. salt in one glass water and sip. Seek the advice of your family physician, or go directly to an emergency room.

INSECT BITES & STINGS

Most insect bites are not serious unless there is an allergic reaction. If there is doubt about what kind of insect has bitten you, call a doctor. If possible, catch the insect in a bottle for identification.

1. Remove stinger if still in skin.
2. Apply ice to area of bite.
3. Apply a thick paste of baking soda and water to area of bite.

BLACK WIDOW and BROWN RECLUSE bites are rarely fatal to adults, but the victim should receive medical attention.

SYMPTOMS

Victim may experience a swelling, redness and burning pain in the area, as well as stomach pain, severe headache, cramps, rash, or profuse sweating.

1. Treat as above.
2. Give aspirin for pain. Call a doctor.

POISON IVY & OAK

Skin may become red and swollen, small blisters may appear on the skin, which may become large after several hours. Victim may have violent itching.

If victim developes a large rash, get medical help. Do no let him scratch.

1. Wash area thoroughly with soapy solution.
3. Apply calamine lotion. For large rash, bathe in solution of one cup baking soda in a bathtub of water.

SHOCK

Shock is characterized by pale, cold skin, a rapid but weak pulse, nausea or severe thirst. In later stages, the victim become unresponsive and pupils dilated.

Give necessary first aid to eliminate the cases of shock, such as excessive bleeding or stoppage of breathing. Have victim lie flat and cover him with a light blanket. Check to ensure open airway, and if patient is vomiting, tilt head to side. For victims of head injuries, keep head higher than rest of body. Other shock victims benefit from having feet raised from 8 to 12 inches above the head.

Call for ambulance immediately.

UNCONSCIOUSNESS

1. Apply artifical respiration if breathing has stopped.
2. Turn victim's head to one side if possible.
3. Place victim on his back with his head lower than his feet.
4. Cover with blanket if necessary.
5. Call a doctor.

EMERGENCY ANTIDOTES

IN CASE OF POISONING, KEEP CALM AND CALL:

A Doctor, Poison Control Center Or Emergency Room At Once

Then using the table below, give FIRST AID at once.

If no antidotes are available, give large amounts of water (Unless victim is unconscious). Keep patient warm and induce vomiting by tickling the back of the tongue with the finger. Do not cause vomiting in cases of Acid or Alkali poisoning. A sample of the substance injested should be brought to the hospital, in the container in which it was packaged. If possible, try to record the time of ingestion and the amount ingested. If the patient has vomited, save a sample of the vomited material.

Act fast in a poison emergency!

POISON: Medicines, Headache tablets, Polishes, Paints, Cleaners, Thinners, Insecticides, Weed killers

1 **CALL NEAREST POISON CONTROL CENTER No. _____**

2 **If you can not get instructions quickly: CALL LOCAL AMBULANCE SERVICE or TAKE PATIENT TO NEAREST EMERGENCY ROOM Hospital phone _____**

3 **DON'T CAUSE VOMITING IF PATIENT:**
- **A.** Is unconscious or in coma.
- **B.** Is having convulsions.
- **C.** Has swallowed a corrosive substance that burns the mouth or throat (Toilet Bowl Cleaners, Lye, Ammonia, Bleach).
- **D.** Has swallowed a petroleum product (Kerosene, Lighter Fluid, Paint Thinner, Furniture Polish.)

4 **After determining that the person has not swallowed a corrosive substance or petroleum product, make the person vomit by:**
- **A.** Giving syrup of Ipecac in the prescribed amount if available.
- **B.** Tickle back of throat with finger.
- **C.** If person doesn't vomit, have person drink several glasses of water and try #2 again.

REMEMBER

PREVENTION IS THE BEST TREATMENT, HERE'S HOW:

Keep all poisons in their own identifiable container.
Store all poisons and medicines high up and locked up.
Never give or take medicine in the dark.
Check all medicines periodically and throw leftovers down the toilet.

KEEP ALL MEDICATION AWAY FROM CHILDREN

BE PREPARED TO SAVE A LIFE

Place nonbreathing victim on back, face up.

Clean out any foreign matter by turning victim's head to side, force mouth open and wipe out throat and mouth with finger or cloth.

Rescue Breathing in Adults:
Open airway by placing one hand on forehead and other hand at base of neck. Tilt head backwards and jaw upward. While maintaining this position, pinch victim's nostrils closed. Take a deep breath and place your mouth tightly over victim's mouth and your own thumb. Blow forcefully enough to make victim's chest rise. Repeat inflations every five seconds.

Rescue Breathing in Children:
Open airway by placing one hand on forehead and other hand at base of neck. Tilt head backwards into sniffing position. While maintaining this position, take a deep breath cover the child's mouth and nose with your mouth. Blow in gently until his chest moves, then take your mouth off and let him exhale passively. Repeat inflations about one every three seconds. **FOR INFANTS USE PUFFS.**

TELEPHONE ANSWERED DAY OR NIGHT

Ames.
you're gonna love us!

Welcome to Ames....
In the heart of Iowa, in the heart of the nation, Ames offers visitors a unique opportunity to partake of cosmopolitan treats, become acquainted with internationally recognized experts representing many fields, enjoy "small-town" hospitality, tour the agricultural heartland of America and relax in a congenial atmosphere. Ames' central location means you can drive to any of the four corners of the state in about four hours, and are within 90 minutes of many of the state's more popular attractions.

You'll love the parks in Ames.
Ranging from less than one acre to 170 acres, the 22 parks in Ames total more than 600 acres of refreshing recreational opportunities for residents and visitors. A golf course, two swimming pools, 15 ball diamonds, 12 tennis courts, picnic shelters, bandshell, hundreds of pieces of play equipment, wooded trails and more await visitors to Ames' parks.

You'll love the arts in Ames.
World-renowned musicians and orchestras, singers, actors, dancers and other artists have found eager and receptive audiences in Ames as they have performed in the facilities of the Iowa State Center. Ames' interest in the arts is evidenced by the very strong local organizations who pursue excellence in a variety of art forms.

You'll love athletics in Ames.
NCAA, Big Eight collegiate and Iowa state high school champions call Ames home. Whatever the season, you'll find top caliber amateur athletic events featuring some of the state's and nation's finest teams taking place in Ames.

You'll love the educational opportunities in Ames.
More than 27,000 students are enrolled at Iowa State University. Continuing education through seminars and special meetings conducted by recognized experts in various fields address the needs of an additional 122,000 people of all ages each year.

You'll love shopping in Ames.
Ames offers the discriminating shopper a wide selection of goods and services in more than 450 businesses in five primary shopping areas and along major arteries. Each major area has its own character, from the enclosed North Grand Mall to the tree-lined Main Street in the Downtown area.

You'll love dining in Ames.
Over 60 restaurants with a wide variety of menus offer diners an excellent choice. From national chains to uniquely Ames...you're sure to find palate-pleasers only minutes from your Ames accommodations.

We have a lot to offer you.
- Convention facilites for 100 to 10,000.
- A 217-bed hospital and some of the finest medical clinics in the United States.
- Over 880 rooms within ten minutes of any point in Ames.
- Iowa State University, one of the nation's finest centers of learning.
- The Iowa State Center complex for the arts and athletics.
- Cy-Ride, a nationally recognized public transit system.
- More than 450 stores for your shopping pleasure.

Location.
Transcontinental U.S. Highways 30 and 69 cross in Ames and Interstate-35 provides easy access to Ames from most points in the country. Smaller aircraft find the Ames Municipal Airport conveniently located and travelers on major airlines landing at Des Moines airport are only 40 minutes from Ames.

You'll love Cy-Ride in Ames.
Cy-Ride, the fastest growing public transit system in the nation, makes travel within Ames easy, efficient and economical. The cooperation of Iowa State University students, administration and the City of Ames in developing Cy-Ride won for Ames the "All-America City" designation in 1983.

OVER 20 YEARS EXPERIENCE

Energy Saving Tips For The Home

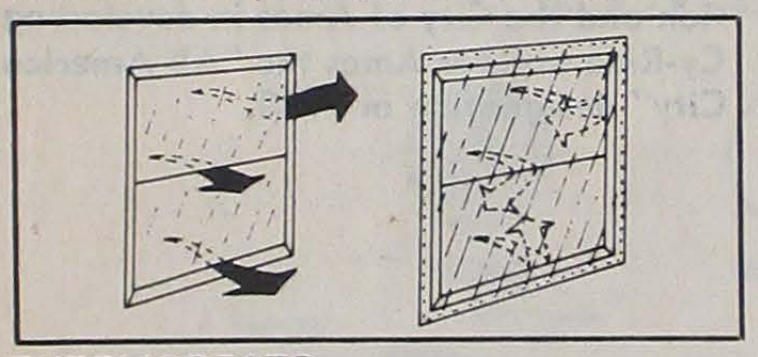

Whether you heat or cool your home, apartment or business with gas, oil, electric or other, you could save yourself 20% - 50% with a moderate investment in insulation or additional insulation. Many older homes do not have ceiling insulation and the addition of 6-inch batts or 8 inches of blown insulation could save 40% on heating costs. Your insulation needs will vary according to the climate of your area and the amount and kind of insulation you currently have. Consult a reputable insulation contractor or dealer for guidance. An investment in insulation today will pay for itself again and again in years to come.

WEATHERSTRIP

Test your windows and doors for drafts by moving a lighted candle around the frames. Any draft will cause the flame to dance. A minimal investment in caulking, weatherstripping materials and time could save up to 10% in energy usage.

In a colder area storm windows can be a good investment and should pay off their investment in five years or less. A less expensive solution would be to cover your windows in the winter with clear plastic. (Apartment renters can do this)

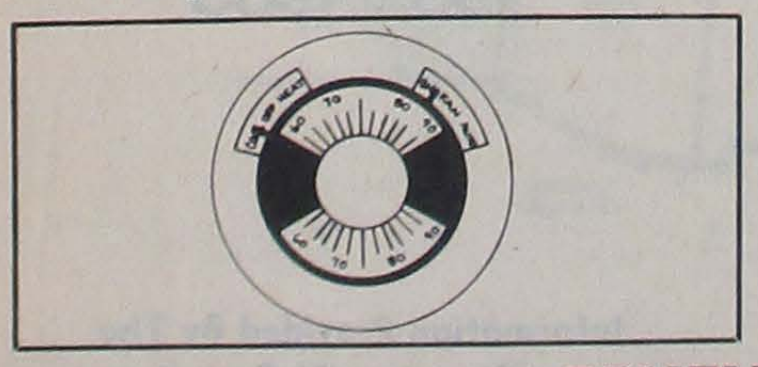

THERMOSTATS

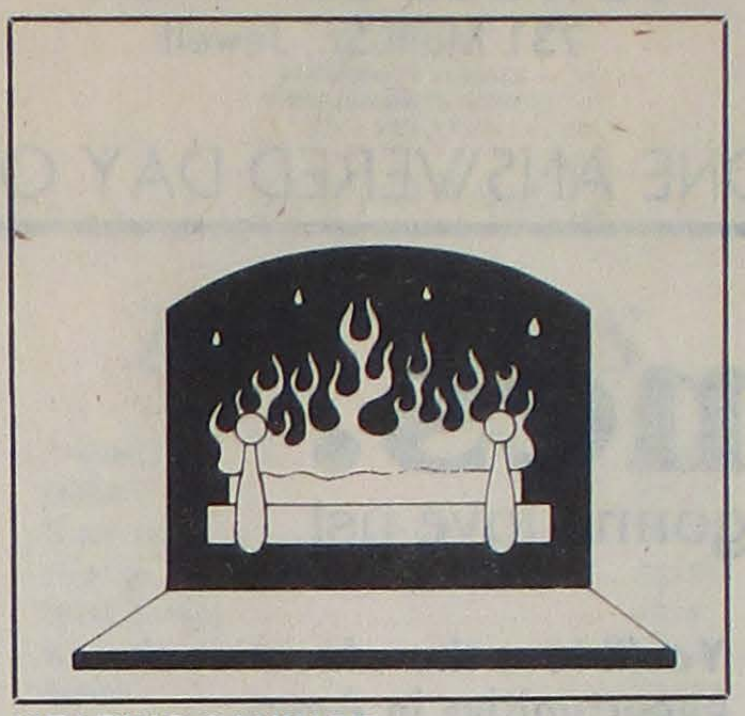

Proper adjustment of the thermostat during both the heating and cooling seasons can account for large savings in energy costs.

In the winter a thermostat setting of 65° during the day with a night setting of 55° is recommended. If everyone in the family is going to be away for the day, remember to dial down for additional savings. For every one degree reduction of the average temperature of your home you can expect about a 3% savings of your energy costs. In winter the least expensive way to warm up is the use of warmer clothing.

A summer air conditioning thermostat setting of 78° is recommended.

You might want to consider an automatic setback thermostat to adjust your heating and cooling needs to your particular schedule. It can automatically turn the heat down when you are at work or asleep and automatically turn up the heat just before you get home or wake up. The automatic setback thermostat also can be adjusted to your summer cooling needs.

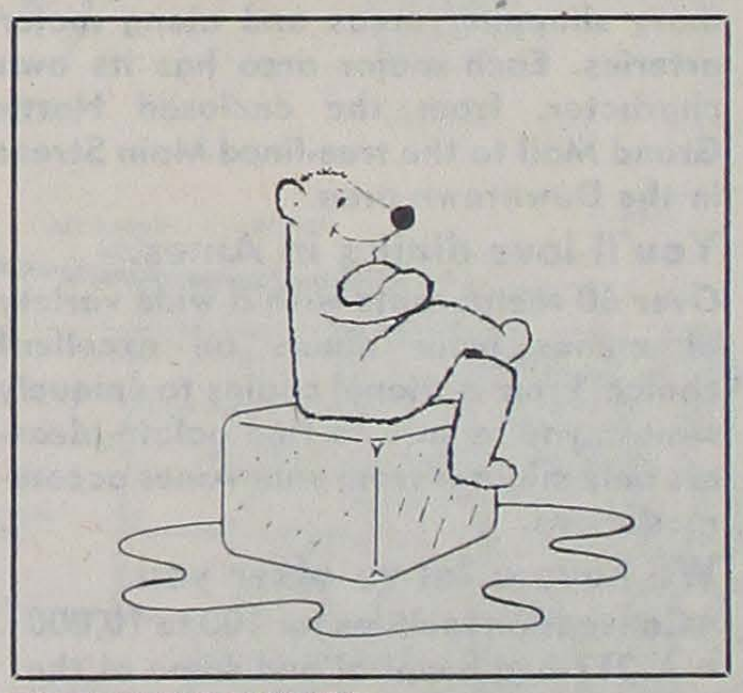

HEATING SAVINGS

In the early Fall don't turn the heat on until absolutely necessary; add an extra blanket to the bed instead.

In the day open drapery on the sunny side of the house and collect the free energy of the sun. Remember to close all drapery at night; heat escapes through glass 14 times faster than through walls.

Close off any unused rooms or close the registers in areas not used. Children should be instructed to avoid unnecessary opening of doors and to go in and out quickly to reduce heat loss. Garage doors left open also drain a house of valuable heat.

Keep the air flow to all registers, grills, outlets and baseboard heaters unimpeded. Clean or replace air filters regularly as it takes more electricity to pull air through a dirty filter.

COOLING SAVINGS

Overcooling and unnecessary cooling is expensive and wastes energy. Window fans, room fans or whole-house ventilating fans use about 1/10 as much wattage as a typical air conditioner. Use of these fans instead of the air conditioner except on all but the hottest days can save energy.

Drapery pulled on the sunny side of the house, awnings, overhangs, and trees can help reduce the heat build up in your house. On hot days try not to use your oven, the stove top, unnecessary lighting or the clothes dryer. If necessary to use these appliances, schedule their use at night when it is cooler.

Again, clean filters and unobstructed vents will help reduce air conditioning energy costs.

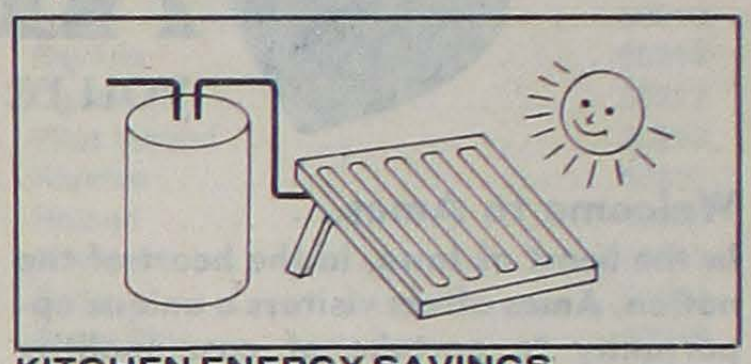

WATER HEATING

Many water heater thermostats are turned up too high. Turning the water heater down from 150° to 140° can save 6%. Also insulate your water tank to keep the heat in.

Repair leaky faucets (especially hot water) and use low-flow shower heads to cut hot water use and save energy.

Take showers whenever possible instead of baths since the average shower uses about half the amount of water as a bath.

Lastly, consider a solar water heater if the need arises to replace your unit. Depending on your climate, and unit purchased, a solar water heater can return its investment in only a few years.

KITCHEN ENERGY SAVINGS

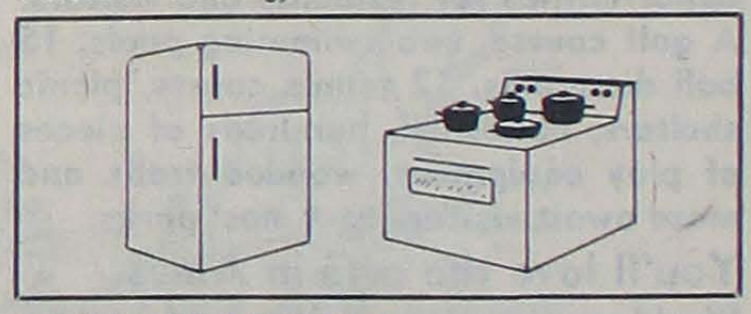

Don't cook food or boil water in an open pan if you can avoid it. Match the pan size to the burner so less heat will be lost to the air.

When using your oven, try to cook several dishes at once. Don't peek unnecessarily in the oven and release valuable heat.

A microwave oven is an energy saver because it cooks food in a much shorter time. It also does not release as much heat to the kitchen as a standard oven. (Important in the air conditioning season)

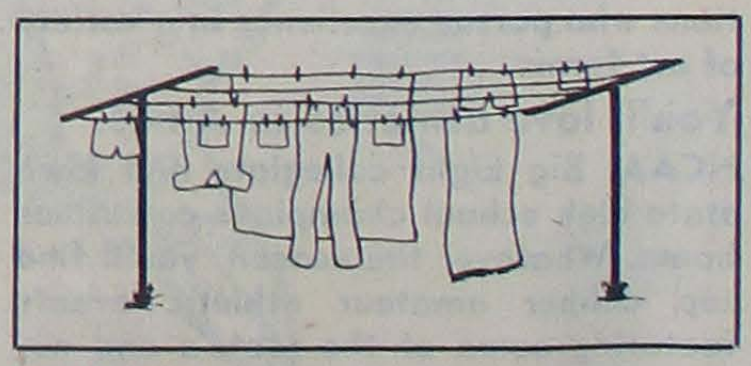

The average dishwasher uses 14 gallons of hot water per load and a lot of electricity to dry the dishes. Make sure that every load is a full load and consider letting your dishes air dry after a load by opening the door a little.

Obviously, holding your refrigerator or freezer door open can waste a lot of energy. Decide what you want from the refrigerator or freezer first and then open the door to look for the item. Before buying a new refrigerator or freezer, check the comparative energy usage figures with the dealer and select the most energy efficient unit.

LAUNDRY SAVINGS

Inefficient laundry habits can waste a lot of energy. Make sure your washer and dryer always have full loads before running. Use the cold cycle of your washer as often as possible. Vent your dryer to the outside in the summer to get the warm moist air out of the house, but in the winter you can vent this air to the inside for added heat and humidity for your home.

REMEMBER ENERGY SAVED = $$$ SAVED

Energy Saving Tips For The Driver

There are 3 major ways to lower your gasoline usage and thus the amount of money you spend for gasoline: 1) DRIVE LESS 2) IMPROVE DRIVING TECHNIQUES 3) BETTER MAINTENANCE OF YOUR CAR

DRIVE LESS

Think twice every time you take the car out of the driveway. Ask yourself these questions: Is this a necessary trip? Could this trip be combined with another? Could this trip be shared with someone else?

Short trips are costly because your auto does not get good gas mileage until it is fully warmed up which takes about 15 minutes. A car that gets 20 MPG will be lucky to get 10 MPG in a trip of 5 miles or less. Instead of five, 5-mile trips; combine the five trips into one 25-mile trip. A typical family car can take the following trips on 25 gallons of gas:

Ten 40-mile trips, or
Sixty 4-mile trips, or
Ninety 2-mile trips, or
one hundred 1-mile trips.

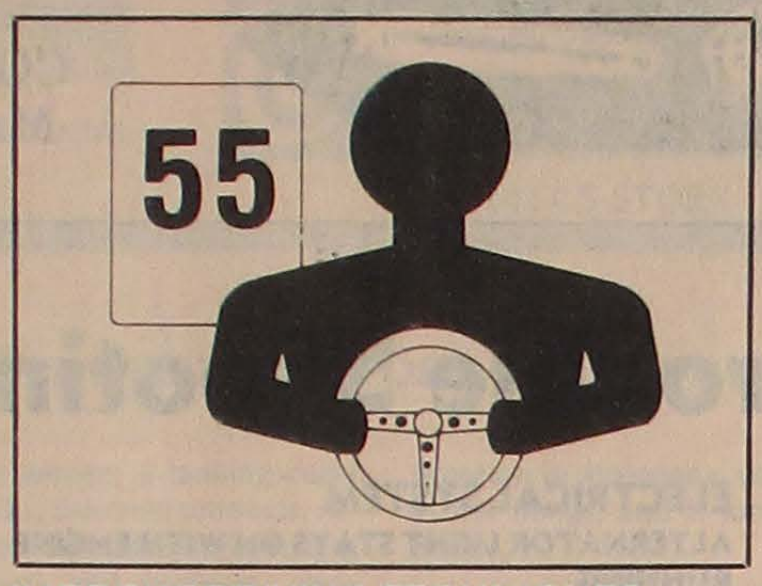

At $1.00 per gallon, the fuel costs would be:
6.4¢ per mile on 40-mile trips, or
10.4¢ per mile on 4-mile trips, or
13.9¢ per mile on 2-mile trips, or
25.2¢ per mile on 1-mile trips.

Preplanning of each trip for the shortest route with the least traffic and with the fewest stop lights and stop signs can save valuable gas and time.

Eliminate extra trips by use of public transportation, use of the mail, and use of your yellow pages. Telephoning around to find what store has the item you are looking for or the store with the best price can save many needless, extra, expensive short trips.

Car pooling to work or car pooling with a friend to the grocery store are proven ways to cut the amount of gasoline you use.

IMPROVE DRIVING TECHNIQUES

Experts say the single most important element in conserving gasoline is the driving skills of the driver. A careful driver should be able to get 30% better mileage than an average driver and 50% better mileage than a poor driver.

It is a fact that a car gets better mileage with a warm engine, but it makes no sense to warm up a car longer than 30 seconds. Wait for the oil warning light to go out or the oil pressure gauge to start to climb and drive off. Take it easy the first couple of miles until the engine and rest of the drive train warms up, especially in cold weather.

Experts now recommend getting up to cruising speed as quickly as possible by accelerating quickly and smoothly without making a jackrabbit start. Then maintain an even speed trying to anticipate the traffic ahead. Repeatedly varying speed by 5 miles per hour can reduce gas mileage by as much as 1.3 miles per gallon.

On the highway drive at moderate speeds. Most cars can get 20% better mileage at 55 MPH than at 70. When on the highway in the summer drive with the windows closed and the vents open. If you are still uncomfortable, turn the air conditioner on low rather than opening the windows. The aerodynamic drag created by open windows eats up more power than does the air conditioner.

Avoid excessive idling by turning off the engine anytime you anticipate being stopped for more than a minute. It takes less gasoline to restart the warm engine than it does to idle.

BETTER MAINTENANCE OF YOUR CAR

There are several free maintenance practices which will get you better gas mileage quickly and easily. The first is to check tire air pressure (when the tires are cool) at least once a month and inflate your tires to the maximum recommended pressure printed on the tire sidewall. The second is to remove all excess weight (bags of sand left from winter, golf clubs, heavy box of tools, etc) from your trunk.

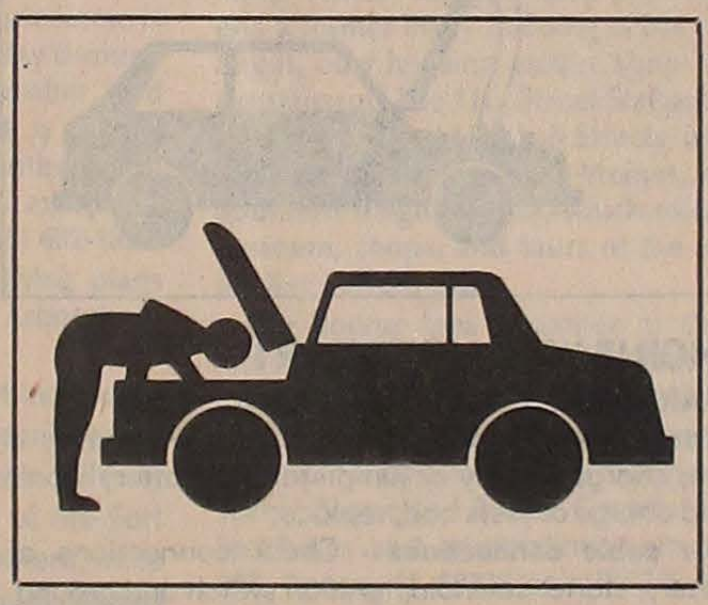

Follow your owners manual maintenance schedules. Replace spark plugs, check the timing, and replace dirty, clogged air and gas filters at recommended intervals.

Brakes or an emergency brake that grab or drag, waste gas and also will need to be replaced in a shorter period of time.

Improper front wheel alignment can increase gas usage as well as shorten tire life. Radial tires have also proven that they get better MPG and last longer than conventional tires.

Change your oil at recommended intervals with a good multi-grade oil. Do not use a higher viscosity oil than recommended by your manual since heavier oils increase the internal friction of your engine. In cold climates in the winter, a lower viscosity oil is recommended to decrease internal engine friction and increase MPG.

Regular maintenance can not only increase your car's MPG, but it can also give your car a longer, more trouble-free life.

REMEMBER GAS SAVED = $$$ SAVED

MILES PER GALLON (MPG) CHART

To use this fuel mileage chart:

1) Fill your tank completely and record the mileage.
2) The next time you need gas, fill the tank completely again. Record the mileage since the previous fill up and subtract to find the difference. This figure is the number of miles you have driven with the tank of gas. The number of gallons it took to fill the tank is the amount of gas used.
3) Use the miles between the 2 fillups and the number of gallons used to find your miles per gallon (MPG) for that tank of gas using this chart.

MILES BETWEEN FILL UPS \ GALLONS	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25

Auto Trouble Shooting Guide

ENGINE WILL NOT START

STARTER WILL NOT OPERATE

Battery weak or defective - Check headlights; if dim, charge battery or jump start. If battery won't hold charge or tests bad, replace.

Poor cable connections - Check connections at battery, starter solenoid, ignition switch and ground. Clean and tighten battery terminal connections and apply coat of petroleum jelly to protect against future corrosion.

STARTER SPINS BUT WILL NOT TURN OVER ENGINE

Armature shaft dirty or corroded - Clean shaft and lubricate with lithium grease.

Starter drive clutch defective - Check drive clutch, replace if necessary. Possibly replacing starter with new or rebuilt unit would be easier than the above.

ENGINE TURNS OVER BUT WILL NOT START

Engine not getting gas - Out of gas? Check for fuel in tank. Check for broken or leaking fuel line. Possibly frozen fuel line, if winter.

Broken fuel pump - Replace

Choke stuck open - If automatic choke; adjust thermostatic coil. If manual; check for broken cable.

No spark - Check to make sure all spark plug wires are connected. Check inside of distributor for broken wires on points or points which do not open when engine turns over.

ENGINE STARTS BUT STALLS

Choke adjustment incorrect - Adjust. Check for broken vacuum lines. Check for sticking or broken linkage. Realign or replace.

Idle speed too fast or slow - Adjust carburetor to specs.

Fuel filter plugged - Replace.

ELECTRICAL SYSTEM

ALTERNATOR LIGHT STAYS ON WITH ENGINE RUNNING

Loose or broken belt - Tighten belt or replace.

Alternator or generator not charging - Have voltage regulator checked. If voltage regulator is okay, have alternator or generator checked; repair or replace.

CERTAIN ELECTRICAL SYSTEMS DO NOT WORK

Blown fuse - Replace blown fuse for system not working. Exam: Headlights out; replace headlight fuse. If fuses continue to blow, check for shorts in system; wires broken, cracked, insulation off, etc.

Turn signals do not flash - First check for burned out bulb or fuse. If okay, replace signal flasher.

COOLING SYSTEM

ENGINE OVERHEATING

Not enough coolant - Add water and antifreeze mixture. Check for leaks.

Fan belt too loose - Tighten.

Broken water pump - Usually leaks & squeals when bad; replace.

Loss of system pressure - Check radiator cap spring tension; replace if bad. Check for leaks.

Thermostat stuck closed - Replace.

Timing off - Reset to specs.

COOLANT LOSS

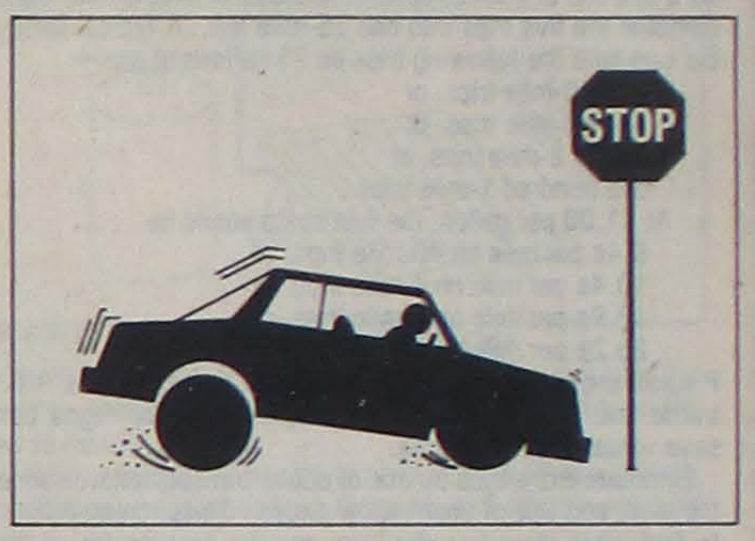

Radiator leaking - Take to radiator shop or solder leaking spot.

Hoses leaking - Check connections; tighten if necessary. Replace leaking hoses.

Water pump leaking - Replace.

Check your automobile's manual for location of part(s) or system(s) which are giving trouble and for specifications.

BRAKE SYSTEM

SCRATCHING NOISE

Worn out brake pads or pucks - Replace brake pads and/or pucks and have brake drum or rotor machined if necessary to remove scratches.

SQUEALING NOISE

Brake drums or rotors glazed - Have machined.

CAR PULLS TO ONE SIDE

One wheel with bad brakes - Check for leaking brake line, plugged line, leaking wheel cylinder or stuck wheel cylinder. Replace.

REAR WHEELS LOCKED

Emergency brake stuck on - Release. Possibly frozen, if winter.

BRAKE PEDAL HOPS UP & DOWN

Brake drum out of round or rotor warped - Have machined.

LOW BRAKE PEDAL

Low & hard - Low brake fluid; top up. Brake linings worn out; replace.

Low & soft - Air in brake lines; bleed.

TIRES

UNEVEN TIRE WEAR

Worn outer edges - Air pressure is too low; add air.

Worn middle - Air pressure is too high; take air out.

Uneven wear across tread - Out of alignment, worn out shock absorbers or worn suspension parts; align and/or replace worn shocks or suspension parts.

TIRE VIBRATION

Out of balance - Rebalance tires.

Suspension problem - Check alignment; check front wheel bearings for enough grease; proper tightness or wear; or check for worn or broken suspension parts.

SHOCK ABSORBERS

RIDE BOUNCY & UNCONTROLLABLE

Shocks are worn out - Replace.

TIRE WEAR UNEVEN

Shocks are worn out - Replace.

1414 S STORY • BOONE

BOONE, THE BIRTHPLACE OF MAMIE DOUD EISENHOWER...AND A WHOLE LOT MORE!

Boone, a midwestern Iowa city with a substantial population of 12,602, has an impressive history. Tracing Boone's heritage back to chapter one, history points to her namesake, Captain Nathan Boone, son of Daniel Boone. In the summer of 1835 Captain Boone and Company H of the U.S. Dragoons marched through this territory on their way to Wabashas Village in Minnesota. The expedition camped about three miles east of the timber along the Des Moines River in Boone County.

The rich, forested land promised a bright future for the pioneers who worked their way across Iowa's rugged prairies to settle the land. Here, a town was platted and named in honor of Captain Boone. By 1865 the town boasted 300 buildings in the locality.

With the arrival of the railroad and all the innovations of such 19th century technology Boone became a reality in Iowa's fast-growing map. In 1866 the name of Boone was changed to Montana. In 1871 a petition was signed and filed in the circuit court asking that the name be changed from Montana to Boone. Boone became the county seat in 1887 when the former incorporated town of Boonesboro, then county seat, was annexed and became a part of Boone. This part of Boone was later called West Boone, and the Court House is still located in that part of town.

The town grew and expanded to include the industrial as well as the farming community. Coal mining in Boone County brought the world of industrial development to the growing community. Remains of that prosperous venture can still be seen in the slag piles surrounding Boone.

Today, Boone's hearty population of over 12,000 is employed in both industry and farming. Boone's wholesale and manufacturing industries include the Merit Baking Company, bakers of Archway Cookies; the Private Stock Winery, Iowa's largest winery; a tanning company, ironworks, concrete products, refrigeration, envelopes, industrial soaps, aluminum doors and windows, electronic aeration equipment, frozen meat products, dairy products, ice cream, floral products, paper tubes and cores, steel beams, farm implements, blank books, and ceramic supplies. Boone is the Iowa Division Headquarters for the Chicago and North Western Transportation Company.

The farming community in Boone is richly diversified with dairy products, hogs, corn, cattle, sheep, oats, soybeans and hay. Livestock markets and grain storage facilities are centered in Boone and the surrounding area.

Boone has six elementary schools and a Junior-Senior High School. Construction started in 1984 for a new addition and remodeling of the Jr.-Sr. High School building. College level education opportunities are available in the Boone Campus of the Des Moines Area Community College.

Also located in Boone is a National Guard unit, the state office of the Iowa High School Athletic Association, and the Iowa High School Music Association.

Boone's city boundaries enclose six beautifully kept parks, including 275 acres in the city. In addition, Boone is not far from the Ledges State Park, one of Iowa's oldest state parks, with 900 acres of lovely wooded park, and ample space for picnickers, campers, and nature lovers.

Recreational activities also abound in the nearby Don Williams Lake and Golf Course and the Boone Golf and Country Club. Several recreational, youth, and church camps are located in the Boone area along the Des Moines River Valley, making Boone County the camping center of central Iowa.

Just outside the city limits, high above the Des Moines River is the legendary highest double track railroad bridge in the world. The High Bridge is now called the Kate Skelley High Bridge, named for a young heroine, who, in 1881 crossed the Des Moines River in the midst of a ferocious storm to warn an oncoming train that the bridge was out. The Kate Shelley Memorial Park and Railroad Museum in Moingona, was established in her honor, and is located south of Boone.

Boone is the only city that can boast of being the birthplace of Mamie Doud Eisenhower, the wife of the 34th President of the United States. Mamie's Birthplace has been restored to its original 1869 era. The home has been toured by thousands of visitors from all fifty states and over thirty foreign countries since dedication in June of 1980. Located at 8709 Carroll Street, this historic home is open from 1 to 5 p.m., Tuesday through Sunday, April through December, and by special arrangement. It is closed Mondays and during the months of January, February, and March, except by appointment, telephone (515) 432-1896.

Iowa's largest library of living plans can be visited at the Iowa Arboretum, located south of Boone.

The nation's newest shortline tourist railroad is the Boone and Scenic Valley Railroad, operated over eleven miles of scenic track, formerly part of the Fort Dodge Des Moines and Southern, once Iowa's largest interurban. Trains depart from 11th and Harrison Streets for a breathtaking ride through the Des Moines River Valley, across the highest single track interurban bridge in the United States, telephone (515) 432-4249.

Tours are also available through several Boone industries, including Merit Baking Company, Private Stock Winery, and the Boone Blank Book Company. Boone has many fine retail stores, three motels, and many restaurants. Visitors can also shop in The Livery, a former livery building at 806 - 7th Street, now housing unique shops and a restaurant. The 11th Street Station, located at 11th and Marshall Streets, is the former Fort Dodge, Des Moines, and Southern freight station, which offers a museum, shops, and tours of the Kate Shelley Parlour Car.

The Boone Area Chamber of Commerce, Convention and Visitors Bureau, located at 806 - 7th Street in The Livery, will assist interested groups and organizations in arranging tours of historic and scenic Boone and Boone Counties. For brochures and information, write Box 306, Boone, IA 50036 or call (515) 432-3342.

NEVADA

POPULATION

Present Estimate: 5,200

GEOGRAPHIC LOCATION

Almost in the center of the state.

DISTANCE FROM OTHER MAJOR CITIES:

Ames	9 Mi.
Des Moines	35 Mi.
Omaha	145 Mi.
Minneapolis	225 Mi.
Chicago	310 Mi.
Kansas City, Mo.	252 Mi.

CLIMATE:

Average Temperature: January 20 degrees; July, 74.8 degrees; Year, 48.7 degrees; Rainfall, 31.12 inches; Annual Snowfall, 29.9 inches.

HISTORY

In 1853 the state legislature appointed three men to locate the county seat of Story County. After thorough examination, they dediced on the location, which is now Nevada on July 27, 1853. The town was named by a Mr. Joseph Thrift, who named the town for the Sierra Nevada Mountains. Tradition indicates the pronunciation was always Ne-vay-da, "vay" rhyming with "way".

COUNTY SEAT

Nevada is the county seat for Story County; all county offices are housed in the newly constructed modern court house. Extension service, S.C.S. and A.S.C.S. offices are located in Nevada.

GOVERNMENT

Nevada is governed by an elected mayor and city council.

MUNICIPAL SERVICES AND INFORMATION

UTILITIES

Municipal water, three deep wells; hardness 30 grain. Iowa Electric Light and Power supplies electricity and natural gas. Modern direct dial system is provided through the General Telephone Company of the Midwest.

POLICE

Law enforcement is provided by four uniformed policemen and two part time officers.

FIRE

Fire protection is handled by a 20 man volunteer fire department with a full time chief on salary. Equipment for fire fighting includes: two pumper trucks, one tanker truck, resusciator and inhalator.

POST OFFICE

Class A, the second largest in the state based on total postage receipts.

NEWSPAPER

Nevada Evening Journal, daily circulation 4,650 county wide. Nevada is one of the smallest cities in Iowa with a daily paper.

FINANCIAL INSTITUTIONS

The Nevada area is served by two banks and a Savings & Loan Association.

The Federal Land Bank Association has an office in Nevada, which serves two and one half counties.

MAIN STREET RENEWAL

More than 100 retail outlets make up Nevada's business community; offering goods and services on a par with cities far greater in size. Serving a rapidly growing trade area of more than 18,000 consumers, Nevada's merchants are progressive, agressive and competitive to the economical advantage of the consumer.

Nevada's merchants have joined together in an effort to update the appearance of the store fronts. Many were repainted, several redecorated. Signs replaced. Nevada businessmen show true community spirit and pride, and constantly work together to achieve the desired end result of a truly modern shopping center.

NEVADA INDUSTRIAL DEVELOPMENT

Private and prominent business and professional persons organized and are stockholders in this enterprise to provide financing for location sites, promotion, development and conduct of such new business, industries and enterprises.

CIVIC, FRATERNAL AND SOCIAL ORGANIZATIONS

Chapters in organizations such as Lions, Rotary, Kiwanis, Toastmasters, Jaycees, all the veterans organizations and auxiliaries, Masons, IOOF, Knights of Columbus, Soroptimists, PEO Sisterhood, Beta Sigma Phi (2 chapters), WaTanYe, Women's Club, Golden Agers, Newcomers Club, Boy and Girl Scouts.

FACILITIES

EDUCATION

The Nevada Community School District includes one senior high, one junior high, and two elementary schools. This school system is well-known for its quality innovative education. Total enrollment is approximately 1,600 pupils. Nevada High School band has won many awards including second place at the Cherry Blossom Festival at Washington, D.C.

Nevada also has one parochial school system including a Seventh-day Adventist Church School (1st through 8th grades) and Oak Park Academy (grades 9 through 12).

Area XI Technical-Vocational College is located 30 miles south of Nevada in Ankeny.

Iowa State University is located in Ames, 10 miles west of Nevada.

RECREATION

Parks: Two City parks and one county park: North Park with playground and picnic area, and the 4-H grounds with free campground, softball diamond and lighted tennis courts. The 4-H grounds are also the scene of the annual Story County 4-H fair. Hickory Grove County Park has picnic, boating, swimming facilities located on a lake 8 miles souteast of Nevada.

The East Story County Swimming Pool, a non-tax supported pool is located in Nevada.

The Indian Creek Country Club has a nine hole golf course with clubhouse facilities.

Nevada also has the Sports Bowl, a ten lane bowling alley.

The Camelot Theater is a beautifully restored movie palace now showing first run movies.

Nevada has a recreation hall for youth.

CULTURE

The library has 12,500 volumes, magazines, newspaper subscriptions and records.

Proximity to Des Moines and Iowa State University gives Nevada the full range of cultural advantages enjoyed by residents. Nevadans are able to see big eight Athletic events, see a variety of stage entertainment or attend the State Fair with more ease than any other midwest community.

The Story County Museum is in Maxwell, Iowa

Gates Memorial Hall, a beautiful new building, 600 can be served at dinners, 1000 can be seated for stage performances. Extra meeting room available.

MEDICAL

Story County Hospital, one of Iowa's most modern small hospitals, was originally built in Nevada in 1951. The Reine Welles wing was added in 1969 and at the same time a complete renovation of the older section was undertaken. This 80 bed institution is capably staffed twenty-four hours a day and features the most up-to-date equipment, including a coronary care unit that is outstanding.

Nevada has two nursing facilities for the elderly and infirm. Three general practitioners, one osteopathic physician, three dentists, one chiropractor and one optometrist provide for the needs of Nevada and the surrounding area.

TRANSPORTATION

HIGHWAYS

U.S. Highway No. 30, the first transcontinental highway in America, runs one mile south of town. U.S. Interstate 35 lies six miles west of Nevada, and U.S. 65 is eight miles east of town. U.S. 30 is east-west, and U.S. 35 and U.S. 65 are both North-South highways.

RAILROADS

Nevada is served by Rock Island and Chicago Northwestern Railroads, providing a direct link to all major midwestern cities.

PUFFERBILLY DAYS

Written by Mary Maybee

Two years ago a popular newspaper columnist (an Iowa Boy) chose Boone Pufferbilly Days as one of the ten worst-named festivals in Iowa. The people of Boone were undaunted by this slur against them. Being very proud of their railroad origin and enthusiastic about their festival, they worked hard and in 1982 Boone Pufferbilly Days was selected as one of the ten top festivals in Iowa.

An estimated crowd of 30,000 attended last year's celebration and over that number is expected to join Boone's 13,000 residents this year.

Many months of planning by a nucleus of approximately 25 committee chairmen and the efforts of several hundred eager volunteers during the three day celebration make Pufferbilly Days a weekend to be remembered. The event is coordinated by A.J. "Toche" Terrones, Executive Vice President of the Boone Area Chamber of Commerce, the sponsoring organization.

In 1977, the Boone Chamber of Commerce Retail Committee decided to promote retail sales with a weekend sidewalk sale and street dance in the downtown area. The name Pufferbilly Days was chosen to give a theme to the event and to recognize the town's founding by the railroad. The first event was chaired by Dale Points. The idea for the event was originated by June Berg and Holly Larson, then president of the Boone Chamber.

In 1978, under the direction of Charles Klinkefus, the parade was expanded in an effort to get more people involved. At this time, Pufferbilly Days was held in late September.

In 1979 George Maybee, Assistant Vice-President and Division Manager-Iowa Division of the Chicago & North Western Railroad, arranged for excursion rides over the High Bridge with diesel engines and coaches from the Union Pacific Railroad. A new tradition was established with the Pufferbilly Days Committee honoring the retired C & NW employees. Mr. James Wolfe, president of the C & NW, came to Boone to be grand marshall of the ever growing Pufferbilly Days. Many railroad employees volunteered their time to run the train rides, which were filled to capacity each trip. Pufferbilly Days had another successful year with the flea market expanding to the park on Sunday.

The 1979 celebration was held in early October with the sale of golden spikes to fund the celebration on an ongoing basis originated by the year's co-chairmen. Chairmen Rick LePera and Dennis McFarland extended themselves and their committees and had a successful event, far greater than anyone had expected.

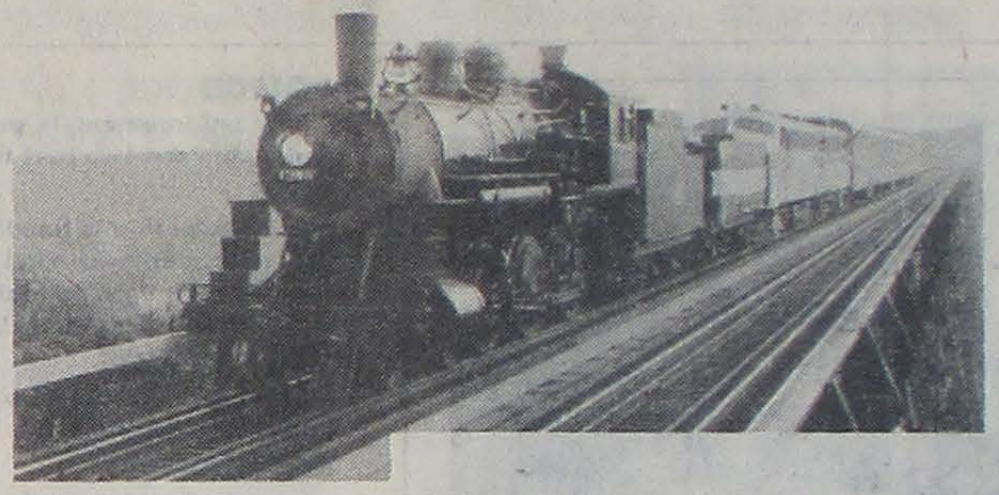

By 1980 the flea market under the expertise of Leonard O'Neil became a major attraction, luring non-Boone residents to Pufferbilly Days. This year the railroad brought in from the National Railroad Museum in Green Bay, Wisconsin the Command Cars used by General Eisenhower in Europe during World War II. The special interest of these cars is the fact that Mamie Eisenhower was born in Boone and visited an uncle, Joel Carlson, here frequently. Her birthplace had been renovated and was entered in the national historical registery by the Boone Historical Society. The birthplace had been dedicated earlier in the year.

Under the guidance of co-chairmen Mel Holthus and George Silberhorn, the parade grew longer, continuous entertainment on the stage, set up on mainstreet, followed through on into street dancing at night. The Sunday program, with "Art in the Park" as its impetus, expanded to be an important segment of Pufferbilly Days attracting many families.

In 1983 the C & NW Railroad raffled off six-course dinners for six winners on their newly acquired "business car." The six lucky winners were chosen by a drawing and the dinners for them and a guest were held the weekend after Pufferbilly Days. Money from the raffle was used by the Chamber of Commerce for the next year's Pufferbilly Days. We now had a real town celebration on our hands, with many eager volunteers anxious to get involved.

Just six years old now the festival developed with surprising speed. All committees set their goals higher than ever. George Maybee announced he had made arrangments for a steam engine, from the Mid-Continent Railway Historical Society in North Freedom, Wisconsin, and rail coaches from the C & NW commuter service in Chicago, to come to Boone and once again provide rides over the newly dedicated Kate Shelley High Bridge and back - - about an eight mile trip.

The parade chairman George Eckstein made a coup d'e'tat this year by obtaining the Iowa State Marching Band to lead off the parade. The 1982 parade was two hours long and the float awards competition was very stiff with many more organizations wishing to get recognition in the now spectacular Pufferbilly Parade. The Beer and Brat Garden was housed for the first time under a gigantic canvas canopy. With so many skilled volunteers running all aspects of Pufferbilly Days, enough profits were generated to give a scholarship to two young people for the Des Moines Area Community College, Boone Campus, as well as provide funds for this year's celebration.

In 1983 the chairmen Don Reimenschneider and Lennie Bloomquist were happy to announce the Mid-Continent Railway Historical Society and the C & NW Railroad had agreed to bring back the steam engine, "Old 1385," and coaches for the Kate Shelley Express across the High Bridge. George Maybee, who was instrumental in getting the railroad's cooperation and participation in Boone's celebration of its rail heritage, was named grand marshall of the parade. With him a representative of each of the nine local railroad unions (including one national union president) were honored as parade marshalls as a tribute to the many hours of service by railroad employees to Pufferbilly Days.

Wine was added to the "Brat and Beer Garden." Pop and hot dogs will also be sold. An early morning breakfast will be available for early risers and parade participants Saturday.

The Buckskin Rendezvous is expecting its largest turnout this year. The annual 5k and 10k Pufferbilly Run is now in its fourth year and growing. The canoe races will be held on Saturday again - - a repeat of a popular event.

Again this year are bus tours of Boone County historical sites, including Mamie Eisenhower's Birthplace. Other new entries are the Pufferbilly Open, an 18 Hole Golf Tournament, and a horseshoe pitching contest.

New also this year is the 11th Street Station, located at 11th and Marshall streets. The station, a unique railroad museum and shopping mini-mall, is a very historical landmark. Built in 1908, it lives again with lots of nostalgia, and it's many shops are decorated with memorabilia from all eras of railroading. Also on the grounds are several vintage railroad passenger cars including the famous 'Kate Shelley" Pullman Parlor Car.

Puppet shows, a magic show, baseball and softball games, the ever popular spelling bee, a pet show, and tennis tournaments are just some of the events scheduled. Pufferbilly Days has something for everyone.

Some may say we have a funny name for our town's celebration, but we think it is the best name we could find for a town that owes its very beginning to the old Pufferbelly engines and the men that ran them. The name may be strange to non-railroad people, but in Boone we are very proud to say it is all ours. Come on home to Pufferbilly Days - - you'll love it!

The established dates for Pufferbilly Days have been established as the weekend after Labor Day

PHOTOGRAPHIC TIPS

INTERCHANGEBLE LENSES

Without interchangeable lenses, the scope of photography would truly be limited. It would be impossible to fill the frame with a single dewdrop gleaming in the rays of the morning sun. Or, to encompass within one frame the splendor of the world's many scenic spots and architectural masterpieces. Likewise, we could not capture a sea-sprayed surfboard rider soaring high atop a mountainous wave, nor could we approach close enough to the many frail, frightened and ferocious creatures of nature to photograph them effectively. Moreover, the fantastic creative effects of ultra-wide-angle, fisheye and super telephoto lenses would elude us as well.

STANDARD LENSES

The standard or normal lens is the most versatile lens for all-around shooting. It has a picture angle which corresponds closely to the view of the human eye, enabling pleasing perspectives for scenery and landscapes, photographs of children and adults, pet photos and other general applications. Standard lenses are also faster (see understanding aperture) than other types permitting outdoor use in both sun and shade, at night in low light, and indoors in dimly lit rooms without flash or tripod.

TELEPHOTO LENSES

The telephoto lens is a wonderful tool for the photographer. It enables him to photograph in sharp detail distant objects which appear too small to be photographed interestingly with a standard or wide-angle lens at the same shooting distance. Telephotos are thus considered great lenses for action sports, news photography, portraits and distant wildlife. They are also useful for candid and surveillance photography, highlighting distant scenes against the background, and other special creative effects.

WIDE-ANGLE LENSES

If much of your photography is of buildings, interiors, landscapes and gardens, spacious travel scenes and the like, or if you are fond of taking pictures that offer a dramatic perspective, you will find one or more wide-angle-lenses to be a welcome addition to your camera bag. This is because wide-angle lenses feature a greater angle of view than the standard lenses, enabling you to get more into the picture. They are great for working in close quarters.

UNDERSTANDING APERTURE

The f/stop or aperture controls the amount of light that is allowed to pass through the lens and strike the film to make an exposure. F/stops are changed by rotating the ring which encircles the lens called the aperture or diaphragm ring. Although there is a highly technical explanation of exactly what an f/stop number represents, for most of us it's far simpler to state that each f/stop number represents a particular amount of light; that any lens set at f/2 will let in the same amount of light as any other lens set at f/2.

Let's say your average lens has an aperture or f/stop range from f/1.4 to f22. Starting with f/22 as the smallest f/stop, the numbers go up in steps representing larger and larger aperture sizes. Even though the numbers get smaller, the lens aperture gets bigger. All you have to remember, though, is that each larger full f/stop lets in twice as much light as the previous f/stop. Similarly, each smaller f/stop lets in only half as much light. So, each time you change the aperture setting by one f/stop you're either doubling or cutting in half the amount of light that will reach the film.

UNDERSTANDING SHUTTER SPEED

The shutter speed selected on your camera determines the length of time light is allowed to strike the film to make an exposure. Working basically the same as the f/stop system, each change in shutter speed either doubles or cuts in half the time the shutter remains open. For example, if you change the shutter speed setting from 1/60th of a second to 1/30th of a second...one speed slower... you let in twice as much light because the shutter is staying open twice as long. On the other hand, if you change from 1/60th to 1/125th...one shutter speed faster...you cut the light in half because the shutter is only open half as long.

F-stops and shutter speeds affect pictures in different ways. Basically aperature controls depth of field and shutter speed controls motion in a photograph. But, remember, for each change in shutter speed there must be an equal change in f/stop if you want the same exposure.

WHY ARE FILTERS NECESSARY?

The human eye has the ability to adapt to different light sources; photographic film does not. Color films are balanced for use in either natural or artificial light. Filters are used to adjust this balance when using daylight film indoors or vice-versa. Black and white film does not respond to colors as does the human eye. Filters are used to correct picture contrast and balance; ie. make white clouds stand out against a blue sky.

FILTERS FOR LENS PROTECTION
A skylight or UV filter is an inexpensive way to protect a valuable lens from dust, greasy fingerprints and breakage. It is cheaper to replace a filter than a lens.

FILM SPEED

It's a good idea to check the camera's film speed dial each time you load the camera to make sure the film speed has been properly set. Film speed (most commonly referred to as an "ASA" number) lets the camera's built-in metering and exposure system know how sensitive the film is to light; the higher the ASA number, the less light required to obtain a properly exposed picture.

SUPPORT YOUR LOCAL CAMERA

When you can, use a doorway or tree to lean against to keep camera motion to an absolute minimum and use the fastest shutter speed that lighting conditions and creative decisions will allow. HELPFUL HINT: For hand-held pictures, the shutter speed should be no slower than the focal length of your lens. With a 50mm standard lens, for example, don't take pictures at speeds slower than 1/60th of a second. With a 100mm lens, hand-held shots are best at speeds no slower than 1/125th second.

FLASH AND "RED EYE"

Red eye is caused by the light from the flash bouncing off the blood vessels in the retina, and reflecting back into the camera lens. Try having your subject turn slightly away from the camera so light doesn't reflect back into the lens, or by taking the flash off the camera and raising it up slightly to one side; red eye can be eliminated from your photographs of people and animals.

PROTECTING YOUR CAMERA EQUIPMENT

Whether you own a $100.00 camera or a complete camera system, it needs to be protected. The basic protection gear should include a camera case, protective filters for each lens, a gadget bag for your system to fit into, lens pouches or cases, lens tissue and lens cleaning fluid. By protecting your equipment from mother nature (i.e., dust, moisture, etc.) you'll get many more years out of your camera, and keep it out of the expensive repair shop.

Old Heritage Advertising & Publishers, Inc., reserves the right to extend by no more than six months the issue date of the directory. While the company anticipates that the issue life of this directory shall be approximately twelve months, it may extend the issue life by up to six months. If the issue life is extended, the customer agrees to pay a pro-rated charge for the extended period.

Great care has been taken in the preparation of this Directory. However, the Publishers cannot and do not guarantee the correctness of all information available to them, or the complete absence of errors or omissions, or the presence of unintentional inclusions. Therefore, no responsibility for the same can be assumed.

This directory is published for the sole use of the residents and businesses within the listed area and has no connection with any other directory publisher.

This Directory is delivered AT NO CHARGE. If we missed you, we apologize. Call the number below for your copy.

IOWA STATE UNIVERSITY FREQUENTLY CALLED NUMBERS

Admissions	294-5836
Alumni Association	294-4607
Athletic Ticket Office	294-1816
Business Office, ISU	294-4556
Daily, ISU	292-2336
Foundation, ISU	294-4607
Housing, ISU	294-2900
Iowa State University, General Information	294-4111
On Campus	Dial "0"
Library, ISU	294-3642
Library Hours	294-4849
Mary Greeley Hospital	239-2011
Memorial Union	292-1111
Registrar, Student Records	294-1840
Student Affairs	294-4420
Student Health Service	294-5801

EMERGENCY CALLS FROM CAMPUS TELEPHONES

FIRE	Dial 9, then 911
POLICE	Dial 9, then 911
AMBULANCE OR MEDICAL EMERGENCY	Dial 9, then 911
UNIVERSITY SECURITY	4-4428

INFORMATION FOR LOCAL TELEPHONE NUMBERS, FROM CAMPUS TELEPHONES

For campus numbers	8 A.M. to 5 P.M. Dial Operator
For student numbers	8 A.M. to 5 P.M. Dial Operator 5 P.M. to MIDNIGHT Dial 4-4357
For off-campus numbers	Dial 9, then 1411

IOWA STATE UNIVERSITY HAS A MODERN TELEPHONE SYSTEM CALLED CENTREX

Centrex service is easy to use—

- **To call another campus telephone, just** dial the last five digits of the listed number.
- **To call an off-campus telephone,** dial 9, then dial the listed number.
- Off-campus callers and out-of-town callers can dial direct to University telephones without going through a central switchboard by dialing the complete 7-digit number.

YOU CAN DIAL ALL YOUR OWN LONG DISTANCE CALLS FROM RESIDENCE HALL PHONES

WHEN YOU DIAL A LONG DISTANCE CALL, IT WILL BE AUTOMATICALLY CHARGED TO THE RESIDENCE HALL TELEPHONE YOU ARE USING.

STUDENT RESIDENCE HALL BILLING

Northwestern Bell will send a statement of long distance calls to residence hall rooms about the 5th of each month. Each room resident will be responsible for his or her own calls, but it may be convenient for one roommate to collect for the calls the others made and pay the entire bill. Payment is due when bill is received and past due by the 17th.

Payments can be made by mail, in person at the telephone Business office, 509 Main or in person at our payment agency listed below:

100% ACCURACY

It takes time and effort to compile white and yellow page listing information, print and distribute this directory. Within that time some phone numbers in this directory have changed due to people and businesses moving in or out of the area and within the area. This is why it is impossible for any telephone directory to be 100% accurate at the time of distribution.

However, the best way for us to find these changes is for you to report them. If you live in the directory coverage area and have moved or changed phone numbers, Old Heritage would like to know.

Please fill out the form on back and mail in.

Thank You

LAST YEAR, WE GRADUATED MORE STUDENTS THAN ALL THE SCHOOLS IN THE NCAA* COMBINED.

Last year, millions of people graduated from Red Cross courses, having learned things they'd always wanted to know. That's because the Red Cross offers 74 different self-help courses.

Courses that teach you everything, from how to be a better parent to how to save someone's life.

Every Red Cross course is developed by a top professional. Tuition is nominal. And there are hardly any admissions requirements.

This year, you could take a Red Cross course and learn something you've always wanted to know. To apply, simply call the people at your Red Cross chapter.

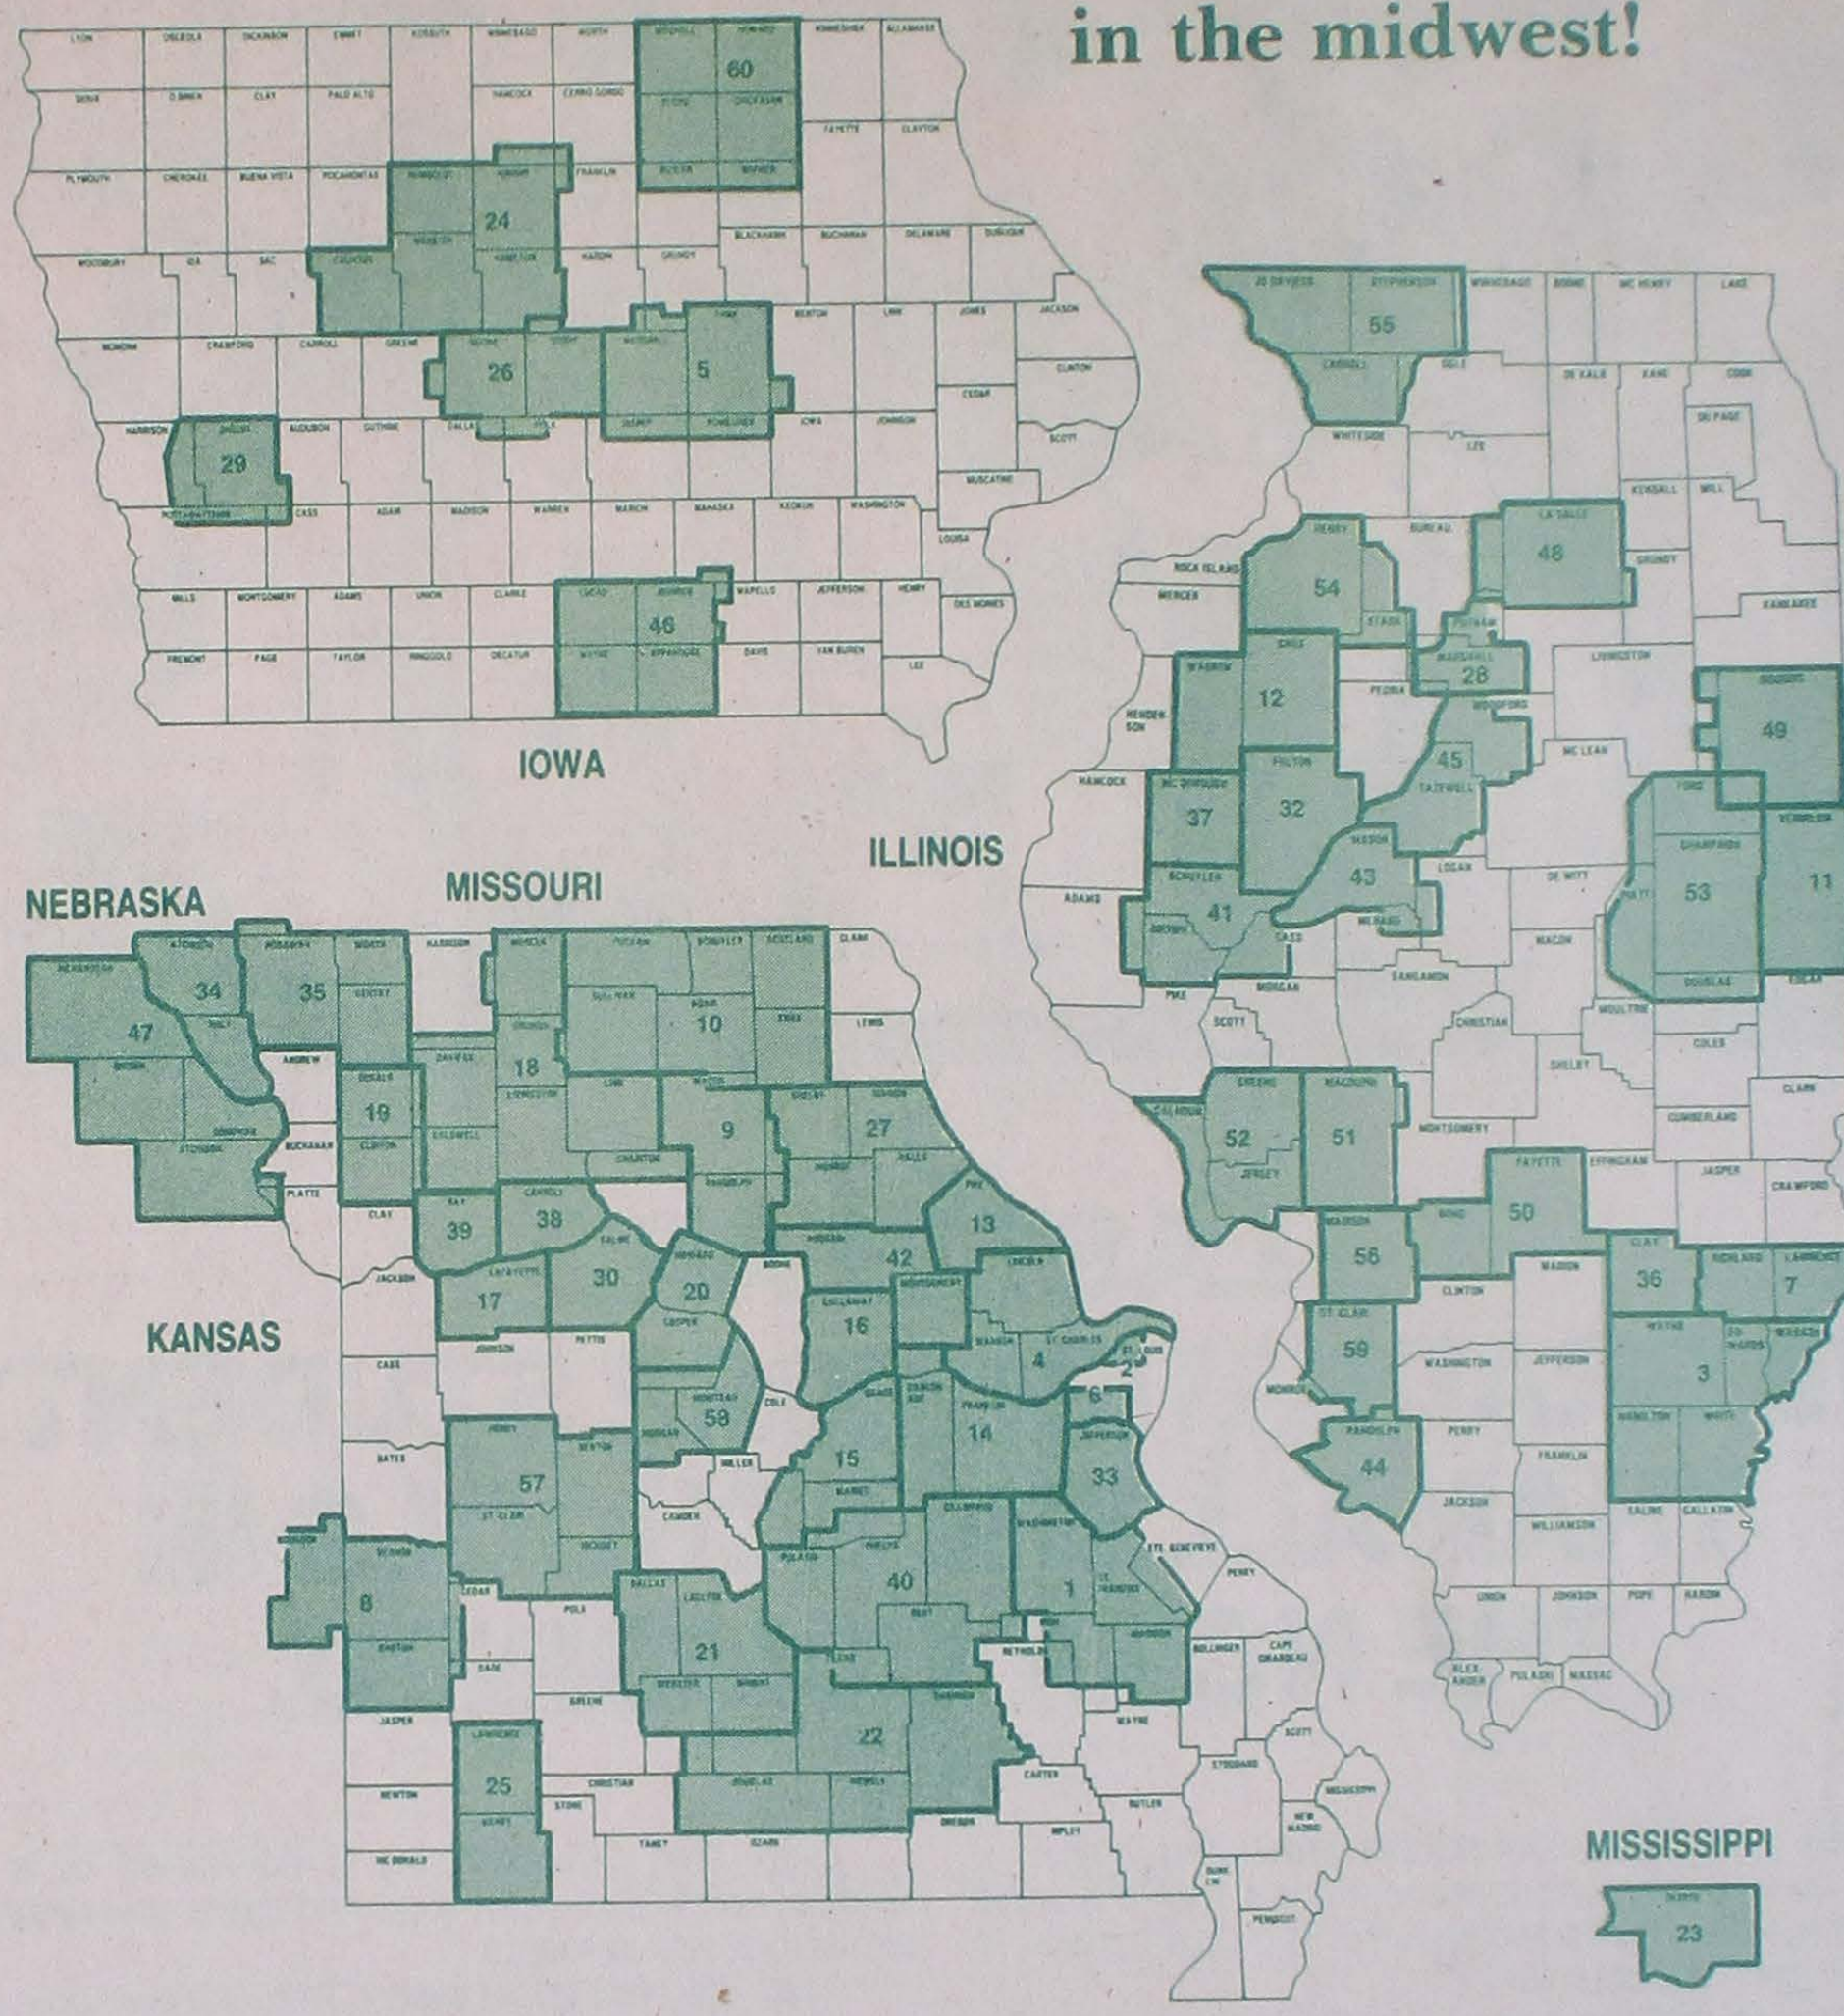

*National Collegiate Athletic Association

Be careful with fire:
There are babes
in the woods.

And those baby animals and trees
need a place where they can
grow up strong and healthy.
The forest is their home.
When you come to visit,
please don't burn it down.

WHY YOU SHOULD MAKE A CORPORATE CONTRIBUTION TO THE AD COUNCIL

The Advertising Council is the biggest advertiser in the world. Last year, with the cooperation of all media, the Council placed almost six hundred million dollars of public service advertising. Yet its total operating expense budget was only $1,147,000 which makes its advertising programs one of America's greatest bargains . . . for every $1 cash outlay the Council is generating over $600 of advertising.

U.S. business and associated groups contributed the dollars the Ad Council needs to create and manage this remarkable program. Advertisers, advertising agencies, and the media contributed the space and time.

Your company can play a role. If you believe in supporting public service efforts to help meet the challenges which face our nation today, then your company can do as many hundreds of others—large and small—have done. You can make a tax-deductible contribution to the Advertising Council.

At the very least you can, quite easily, find out more about how the Council works and what it does. Simply write to: Robert P. Keim, President, The Advertising Council, Inc., 825 Third Avenue, New York, New York 10022.

DOES SHE DESERVE MORE HELP THAN HE DOES JUST BECAUSE HER DISEASE IS BETTER KNOWN?
United Way supports a wide range of human service agencies—charities we all know but also less well-known organizations which otherwise might not get the needed finances to carry on their good work.
Thanks to you, it works. For all of us.
United Way
